Local Government Technology Across America

Technology is transforming both the business and leadership of state and local government. Route Fifty hit the road to meet with innovators and technologists to discuss some of the biggest themes in government technology.

Top State and Local Priorities in 2019

Leaders in state and local governments are pushing for big changes at the federal level this year, while taking on key challenges at home. This new eBook is a briefing on the key priorities of state and local leaders, based on reports from the annual legislative policy summits like the U.S. Conference of Mayors, National Governors Association, National Association of Counties and National League of Cities.

Evolutions in Law Enforcement

This special report will highlight the new challenges and leading technology issues being faced by state and local law enforcement

agencies, including facial recognition capabilities, probation reform, and the increasing number of hate crimes across the U.S.

How Prepared is Your Community?

While some disasters come with advance warning, like hurricanes, others strike suddenly, like earthquakes. Emergency managers, first responders and public officials have to plan accordingly and when a disaster hits, react quickly to keep their communities safe. In this Route Fifty special report, we're looking at disaster preparation, response and recovery.
